I am not allowed to give out contact for Fannie Mae managers, but I can request access on your behalf and let you know when it is approved. Since it is a fence issue I am assuming you will not need access inside the home? What kind of work/vehicles/materials will be used for installing the fence? Are you expecting any changes to the condition of the property as result of the fence installation?

Thank you,

Katie

Good Morning Katie, I am hoping that you can give me you contact with Fannie Mae. We need to request access to the property from the current owner of record. As mentioned in the previous email, there is a fenced area in the backyard. We need access to this area, and we need to extend the fence about 50 feet to the north and 50 feet to the west.

Thank you for your help.

Thank you very much for reaching out to us and providing this information. This property is a foreclosure that is now owned by Fannie Mae and we are their property managers. We have notified them of the environmental issues with this property and we have recommended that the home be re-purchased by the original loan servicer. At this time we have halted all services for the property and are awaiting a decision on the re-purchase issue. I will let you know as soon as we have a response from the bank regarding the re-purchase.

Thank you,

Katie Wells

Hello Diana, (b) (6), my name is Katrina Higgins-Coltrain and I am the Environmental Protection Agency project manager for the Wilcox Superfund Site. I have been working with Todd Downham of the Oklahoma Department of Environmental Quality over the last month to get a better understanding of the site as well as the concerns of the community. I have also left a voicemail with your office regarding this topic.

It is my understanding that you are currently the realtor for a property that is located within the boundaries of our area of concern (b) (6). I wanted to contact you to discuss the history of the site and where we are in our investigation. Please find attached, some site literature to help you understand the site better as well as the cleanup process we are using to investigate and potentially cleanup the site. This information can be shared with any other person interested in the site. The ATSDR ToxFAQs are information related to the contaminants we know to exist on the site.

At this time we are not aware of any immediate health related concerns when on the property on in the homes located on or near the site. The property in questions does have a fenced area in the backyard that limits access to tar-like material that is mostly buried but can be found on the surface in various spots. Please stay outside of the fenced area, and if you do find additional areas on the property outside of the fenced area where the tar-like material has come to the surface, please notify me and do not touch it.

If you have other questions, do not hesitate to call. Also, if you wish to talk with the ODEQ project manager

Todd Downham, I have included him on this email, and his number is [405-702-5136](tel:405-702-5136).
